Vac-Trap

*Combo Unit Accessory**

The Vac-Trap is a new debris trap that connects to the end of your suction tubes replacing the crown nozzle. Sitting at the bottom of the invert in the sewer manhole, the Vac-Trap fills with debris as water is flowing through it. Once the trap is full, you'll see water backing up. Turn on the vacuum pump and suck up the contents then repeat the process. Available in 6" to 24" sizes. Flanged to fit your 6" or 8" tubes.

- Lets water flow downstream
- Saves pump wear and fuel by eliminating the need to run vacuum pump continuously.
- Greatly reduces decanting time

Pays for itself in 2 days!

Call our parts department for details.

*patent pending
