

Introducing a **New Program** from Kinloch Equipment!

Vactor Rodder Pump Exchange

NO EXTENSIVE DOWNTIME!

What is it?

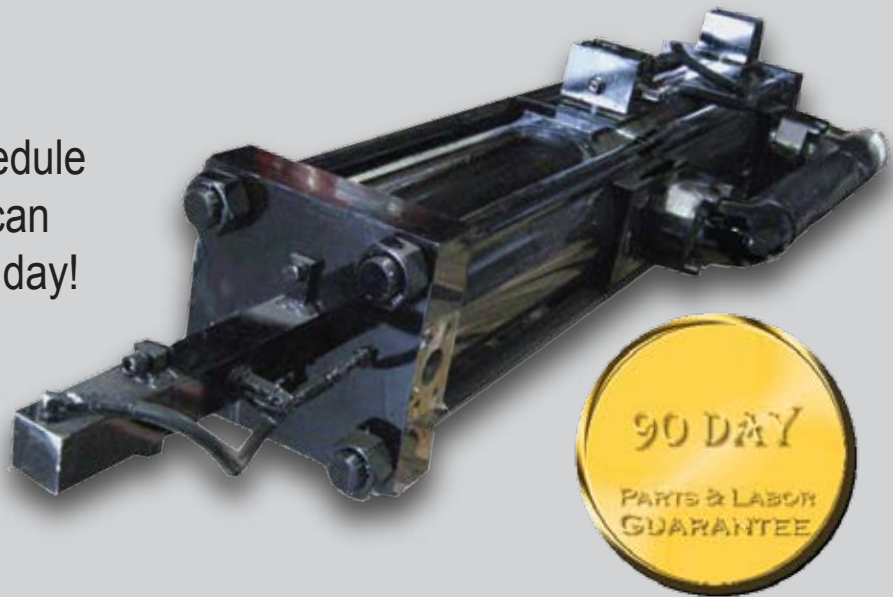

The Vactor Rodder Pump Exchange is a program designed for customers who need a pump repair but don't want to risk having extensive downtime.

How does it work?*

Kinloch shop techs remove your malfunctioning pump from your truck. They replace it with our in-stock rebuilt pump, and have you back on the job in less than a day. Our shop later rebuilds your original pump to our rebuild spec and bills you for the service at that time.

What is the benefit?

Without the need to schedule repairs, our shop techs can have you in and out in a day! Customers have a working pump protected by a 90 day warranty, resulting in less downtime for the same cost!

*Dependant on availability of rebuilt pump and customer agreement to work order. One day turnaround dependant on shop availability. Replaced parts can be picked up at our shop.
